A COMPREHENSIVE HEALTH CHECK-UP PROGRAM WITH STATE-OF-THE-ART MEDICAL TECHNOLOGY

In this comprehensive health check-up program, our state-of-the-art medical technology can quickly provide a detailed and accurate evaluation of your health condition as well as any risks for illness – a sustainable way to stay strong and healthy.

GET YOUR BLOOD EXAMINATION AT THE LAB

A blood test at the lab helps to evaluate your health conditions and gives an accurate indication on the functioning of your organs. By identifying risk factors and the possibility for illness based on your profile, your doctor can prescribe the right treatment.

HYPERBARIC OXYGEN THERAPY

Breathing oxygen at a high pressure promotes blood flow to organs that have been starved. This alleviates oxygen deprivation and replenishes the brain and nerves, improves white blood cell function, fights infections, and stimulates wound healing.

FEEDING VITAMIN C FOR BETTER DEFENSE AGAINST FOREIGN SUBSTANCES AND PATHOGENS

The right dose of concentrated vitamin C through IV Drip can help boost your immunity, restore clear skin, and reduce allergies. This therapy helps the body defend against foreign substances and viruses and get rid of cells that may become cancerous.

WELLNESS

Treatment and Therapy

BOOSTING WHITE BLOOD CELL PRODUCTION TO ENHANCE THE IMMUNE SYSTEM AND PREVENT ILLNESS

Boosting white blood cell production to its optimal level can enhance the immune system, which helps the body fight against viruses and flush out toxins. This treatment helps relieve fatigue, build immunity, and promote better health.

NOURISH THE BODY WITH RESTORATIVE NUTRIENTS

IV Therapy, or intravenous vitamin therapy, is a health secret whereby restorative nutrients pass directly into the bloodstream to efficiently replenish the body. The multiple vitamins and minerals nourish the body to achieve quick and visible results.

STRENGTHEN YOUR BODY FROM THE CELLULAR LEVEL

Enhance your immunity at the cellular level with an Immunity Booster. Using an intravenous drip technique or IV drip, vitamins are fed directly to the veins to strengthen your line of defense and promote quick and efficient restoration.

A RELAXATION MASSAGE IN THE THAI TRADITION (60 MINUTES)

Among the various traditional Thai medicine practices, Thai massage is a therapy that helps relieve body aches and pains, reduce stress and headaches, improve muscle flexibility, and stimulate blood circulation. This treatment will leave you feeling renewed.

BOOSTING IMMUNITY AT THE CELLULAR LEVEL TO MINIMIZE THE RISK OF INFECTIONS OR SEVERITY OF SYMPTOMS

Feed vitamin D directly into the veins – IV Drip – to boost immunity at the cellular level and minimize the risks of infections or the severity of symptoms. This treatment delays cellular deterioration and helps retain the ability to fight against viruses.

A RELAXATION MASSAGE WITH ESSENTIAL OILS (60 MINUTES)

A relaxation massage with essential oils can help alleviate fatigue and stimulate blood circulation. The aromatherapy of essential oils helps clear your lungs, reduce stress, and exfoliate the skin to reveal a clearer and smoother texture.
